Fastman
SAFE, SIMPLE, SECURE

FASTMAN DEPLOYMENT PACKAGES

Your Fastman solutions. Expertly deployed. Ready for your business.

From installation to tailored configuration, get the expert support you need to make the most of your Fastman solutions.

Every organization has unique requirements. Whether you're introducing a new Fastman product or adapting its capabilities to your business processes, the right expertise can make all the difference.

Fastman's Deployment Packages provide structured professional services to help your IT teams, system administrators, and business users successfully install, configure, and adopt Fastman solutions within your OpenText Content Management or OpenText Core Content Management environment.

DESIGNED FOR YOUR FASTMAN SOLUTIONS

Our deployment services support five specialized solutions for OpenText Content Management:

Permissions Manager	Simplify permissions administration, improve access visibility, and strengthen information governance.
Bulk Data Manager	Streamline bulk content imports, migrations, and metadata updates.
Bulk Data Manager for Core	Enable business users to bulk upload content, manage metadata, and perform mass updates within OpenText Core Content Management.
Access Manager	Control which functions users can perform, helping support security and compliance requirements.
Extended ECM for DocuSign	Enable electronic signature processes directly from your ECM environment.

Three packages. Built around your needs.

STANDARD DEPLOYMENT PACKAGE

16 hours | Get started with confidence.

Get the technical guidance and training your team needs to start using your Fastman solution.

What's included:

- **Installation support:** Assistance with product installation in up to two non-production environments, including version and patch guidance.
- **Initial configuration:** Expert support to configure the selected Fastman product and its key settings.
- **Training & adoption:** Dedicated sessions to help administrators and business users understand product functionality and how to use it effectively.

Ideal for: Organizations implementing a Fastman solution and looking for expert support during initial setup and adoption.

BUSINESS DEPLOYMENT PACKAGE

24 hours | Tailored to the way you work.

Configure your Fastman solution around your specific business requirements, with dedicated consulting and implementation support.

What's included:

- **Requirements consultation:** Understand your business needs and define the required configuration.
- **Tailored development:** Create solution-specific profiles or custom reporting based on the selected Fastman product.
- **Testing assistance:** Support your team in validating the implemented configuration.

Deliverables by solution:

Fastman solution	Included deliverable
Permissions Manager	One custom WebReport tailored to your reporting requirements
Bulk Data Manager	2–3 profiles supporting bulk migration or transformation activities
Bulk Data Manager for Core	2–3 profiles supporting bulk content imports and metadata management activities
Access Manager	2–3 profiles defining permitted or restricted functions
Extended ECM for DocuSign	2–3 profiles supporting your electronic signature requirements

Ideal for: Organizations looking to adapt their Fastman solutions to specific operational processes and requirements.

ADVANCED DEPLOYMENT PACKAGE

40 hours | Take your capabilities further.

Access specialized consulting services to address more advanced requirements within your OpenText Content Management environment.

Available services:

- **CIS Model Transformation:** Review and optimize user and group management, access control, taxonomy and business workspace structures, including assistance with workspace migration.
- **Custom WebReports:** Develop reporting capabilities based on your requirements, with assistance for testing and deployment.
- **Workflow Development:** Design and implement workflows to support your business processes, with assistance for testing and deployment.

Ideal for: Organizations with more complex requirements involving OpenText Content Management structures, reporting or workflow automation.
