

BRIDGE CONNECTOR

Part of the
Management Suite for Extended ECM

Manage Moves and Updates in your OpenText Extended ECM Environment

- Move content from one or more locations in Extended ECM to a new destination
- Save time and eliminate the error-prone manual process.
- Add or update categories and attributes, rename files, change permissions, and clean up empty folders.

Simplify data migration or content movement within your Extended ECM. With this tool, you can move content from one or more locations to another, while ensuring that meta-data and permissions are either retained or updated. This eliminates the need for manual processes, reducing errors and saving you time and effort.

Control At Your Fingertips

The intuitive dashboard displays the status of all running jobs, providing you with a comprehensive view of your team's assignments. With its user-friendly interface, you can easily track the progress of your managed moves and quickly identify any issues that may arise. The dashboard guides the business analyst through the processing steps, ensuring that the quality control measures are in place. This enables your team to work more efficiently and effectively, leading to improved outcomes and increased productivity.

Collaborate With Ease

Fastman Bridge Connector simplifies collaboration and meta-data management for multiple users. With this tool, businesses can easily work together on projects, locate and retrieve documents, and streamline their workflow. This powerful solution is a must-have for companies looking to boost productivity and stay organized.

More Powerful Together

The Fastman Bridge Connector utilizes our Bulk Data Manager and Permissions Manager to make migrations simpler and reduce costs. Permissions Manager allows administrators and power-users to quickly identify and address any information leaks while Bulk Data Manager enables easy completion of tasks through saved searches and attribute updates.

With the integration of the Bridge Connector, users can launch Bulk Data Manager from any Extended ECM workflow step, while Permissions Manager can be launched from the workflow step to display relevant content access rights and facilitate quick updates.

If you want to manage the moving of content from one or more places within Extended ECM to a new location, Bridge Connector is an essential component within your operations.

BRIDGE CONNECTOR KEY FEATURES

Eliminate Tedious Tasks

Automates drawn-out data management activities.

Fewer Errors

Redundant tasks can lead to costly errors, save time and assure the integrity of your database.

Works Out Of The Box

No costly migration scripts are required.
