ACCESS MANAGER PRO

Part of the
Management Suite for Extended ECM

Fastman
SAFE, SIMPLE, SECURE

A turnkey solution enabling control over access to OpenText/SAP Extended ECM functions.

- Limit access to specific functions
- Stay compliant with regulatory and licensing obligations
- Minimize information security risks

Gain complete control over your OpenText/SAP Extended ECM platform with Fastman Access Manager. In just a few hours, you can easily manage current users' access to functions, ensuring data security and preventing costly policy overruns.

Achieve Complete Control

We are committed to helping your organization maintain secure, reliable, and compliant content. We understand the importance of having complete control over the functions accessible to your users in achieving this goal. Unfortunately, the standard OpenText/SAP Extended ECM configuration does not offer the level of control necessary, raising concerns about unauthorized actions by your users. However, we believe that you should have absolute control over the actions your users can take, regardless of how they access the system.

A Proactive Compliance Solution

Fastman Access Manager enables you to proactively maintain compliance without depending on end-user training or implementing quick fixes to address errors after they have occurred. We help you avoid fines or the necessity of purchasing full-user licenses due to policy violations. Instead, we equip you with the tools and strategies needed to maintain compliance and security effortlessly. Trust us to assist you in achieving your objectives and keeping your content safe and secure.

Data Security Experts

Fastman is a leading authority on Extended ECM information security, with almost 20 years of experience working extensively with Extended ECM permissions. The unique combination of technological capabilities and OpenText product know-how offered by Fastman and Access Manager SE is unmatched anywhere, so you can remain confident that your information security and license compliance risks are under control.

We understand the challenges you face with access control, which is why many global organizations turn to Access Manager SE as a proven, out-of-the-box solution.

ACCESS MANAGER SE KEY FEATURES

Control User Functions
A simple administration interface allows system admins to manage exactly what functions your users can and can not perform.

Prevent License Overruns
Configure read only access to enforce your licensing policy.

Increased Privacy
Allows the restriction of viewing of private meta data.

Control By User Groups
Restrict certain key functions by implementing a lock-down on Extended ECM. These functions include:
• Adding
• Deleting
• Printing
• Copying
• Moving files
All of which increase data security.

White List Rules
Enforces Smart UI usage.
